

WHITE PAPER

Khalifa

FINANCE

WE MAKE MILLIONAIRES

Introduction

1. What is Khalifa?

Khalifa is a BEP-20 token that aims to change the lives of its holders. Khalifa finance aims to make at least 100 millionaires, that will be achieved by doing massive airdrops, extensive marketing and airdropping 999 exclusive NFTs to 999 Khalifa holders. Khalifa token aims to be the one of the leading “store of value” asset class.

2. What has Khalifa been planning?

We're building a social network with as main focus to make at least 100 millionaires, with a lottery system. We are going to airdrop tokens to random winners via lottery system every week. Furthermore, our rare, exclusive and luxurious NFTs will be airdropped to 999 Khalifa holders for free. With only 999 Khalifa NFTs ever to be minted, the scarcity and unique traits will drive the price and we believe these will change the lives of many. Furthermore, we plan to go cross-chain, so that we bring more exposure and liquidity to Khalifa finance and get more CEX listings.

Key Takeaways

- Khalifa finance is the “Luxury Token”, that aims to change lives of its loyal holders.
- Khalifa is the utility token of Khalifa finance.
- Our mission is to change lives of AT LEAST 100 holders.
- Khalifa NFTs will be free airdropped to 999 lucky holders.
- Only 999 NFTs will ever be minted for Khalifa finance. The scarcity will drive its price to sky heights.
- Khalifa token airdrops every week for Khalifa token holders!
- Cross-chain liquidity bridges and CEX listings.
- More to follow...

Why invest in Khalifa?

We build and lift our community

We have many experienced team members, who are determined for the success of our mission. Our internal staff members, designers and developers are working around the clock to prepare for the launch and success of Khalifa token. Our marketing team is experienced in growing the community organically and taking many influencers on board, which will help Khalifa to become one of the top cryptocurrencies.

Holders Rewards

Khalifa finance holders are rewarded with 5% of redistribution tax. That means your Khalifa portfolio will keep on growing by just holding the Khalifa tokens.

Anti-Whale and Bot Prevention

The token has built-in anti-whale and bot trading algorithms, which will ensure that bots cannot manipulate the price, and nobody can dump the token price significantly.

Transparency

Khalifa finance will be totally transparent to its community. A clear tokenomics, with only 9% of team tokens and vested over 10 months, will ensure that team cannot dump Khalifa tokens. Our team aims to grow Khalifa token and make it a luxury token that every crypto enthusiast would take pride in holding. A token so big that it would become a household name.

Khalifa finance will have 6% of the total supply reserved for airdrops in our airdrop wallet, that will be public to the community to see the flow of money. The marketing wallet will have 5% of the tokens (public wallet) that will be used to promote the token furthermore to attract mainstream audience.

All the wallets will be public, and the tokens will be vested over 10 months period, which will ensure a healthy growth of Khalifa token without any major dumps.

Hence, Khalifa token is 100% community run, democratic and transparent cryptocurrency. Community trust is very important in growing any cryptocurrency and we take pride in being totally transparent to our community. Therefore, no decision would ever be taken without our community's consent and votes.

Liquidity expansion over different DEX

The liquidity will be locked for 6 months initially to build trust within the community. The reason for only 6 months lock is to be able to split and expand liquidity over different DEXs.

We will be on PancakeSwap initially, however, we do not want to tie Khalifa token to only one DEX because that results in less exposure. We plan to bridge our liquidity to Ethereum and Avalanche blockchains after initial 6 months period of token. That will not only bring more exposure and volume to the Khalifa finance, but also help us with big, centralized exchange listings (CEX).

However, as we are 100% community governed, and all the decisions will be governed and voted by the community. The community will decide the direction of this token, while the team will ensure the token keeps on growing.

Exclusive NFTs

The Khalifa finance is bringing 999 exclusive NFTs to its holders, that will be completely free and airdropped to the wallets of 999 lucky holders (who are holding more than 9 Million Khalifa coins). The NFT trading will be enabled on the Khalifa website and as well as our portfolio will be listed on OpenSea.

When Marketing?

Khalifa finance is on a mission to be so popular that it becomes a household name. Therefore, we have an extensive marketing campaign lined up. Our marketing team has grown many projects to sky heights. Therefore, we have confidence in what we are doing.

We have many big names and crypto influencers lined up, who will be taken on board to help promote the Khalifa token. Please note that Khalifa token is aiming to be a “store of value”, not a pump and dump scheme. We will lift our community and especially our early adopters. We are aiming to get our holders financially free and comfortable in the crypto space.

We have a mission and a plan, and we will grow together with our community.

Future Prospects

We are planning to develop a Khalifa ecosystem, with a wallet, DEX and Khalifa blockchain. We are here to stay and make our space in the crypto world.

Khalifa Token Benefits

Khalifa is a project based on a BEP-20 protocol on Binance Smart Chain (BSc), this grants low gas fee on transactions and fast operations. We do plan to expand liquidity over to other ecosystem chain like Avalanche (Avax) and Ethereum networks to bring more volume to the coin, hence increasing the price of the coin. So, being an early adopter will be highly beneficial to Khalifa holders. The presale will be run at 10% discounted rate than listing on PancakeSwap, making whitelisted wallets profitable immediately on listing. However, we are not after the peanuts. We are getting it to be a 100x token and with NFTs being released that only holders will have access to, the potential of Khalifa token is endless.

Khalifa project is based on following (but not limited to) fundamental points below:

1. Holders Rewards – 5% of the tax is redistributed among all holders.
2. Automatic Liquidity Pool (LP) and burn – On every sell 5% of the BNB is added back to liquidity and \$Khalifa tokens are burned, raising the price floor. So, our holders make money when people sell or buy.
3. Cross-chain compatibility bridge (coming in Q1 of 2022).
4. Community governed and voting power to holders.
5. Lottery system to airdrop Khalifa tokens to random holders.
6. Luxurious Khalifa NFTs coming to the platform and will be airdropped free to 999 lucky holders.

Tokenomics

- Total supply: 1 Trillion
- 6% is reserved for the Airdrops to the community
- 9% is the team wallet (vested linearly over 10 months period)
- 5% is reserved for marketing
- 70% will be added to the presale and liquidity pool
- 10% burned upon listing

Tax breakdown:

Total tax is 11%, on every transaction:

- 5% is redistributed among all holders
- 3% is added back to liquidity to raise price of token
- 3% is burned
